

LEGACY 450

BY EMBRAER

SPECIFICATION

IT'S WHERE YOU WANT TO BE

The new Embraer Legacy 450 is, by far, the largest of all midlight jets. It is also the most versatile, thanks in part to its exclusive fly-by-wire technology. Even though it has more speed and greater range, the Legacy 450 can take off and land on shorter runways, giving you access to more airports.

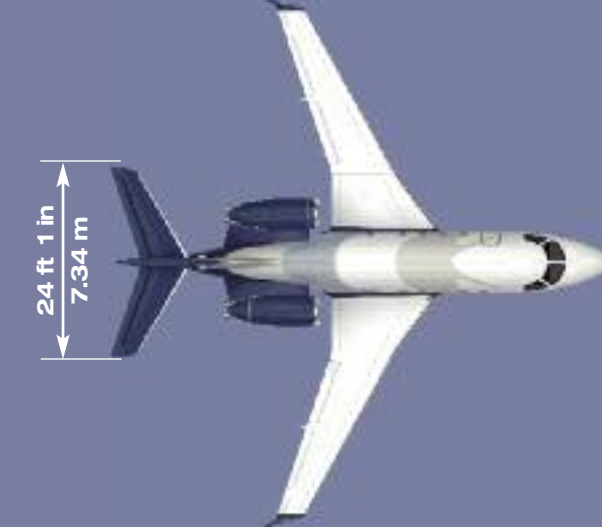

The interior of the Legacy 450 frees you to experience a new sense of liberation with the largest cabin and the only six-foot stand-up cabin with flat floor of any jet in the class. The influence of our partnership with BMW Group DesignworksUSA is felt in its subtlety and sophistication. Large windows bathe the space in sunlight to create an atmosphere of tranquility and enhance the sense of space. A maximum cabin altitude of 6,000 ft. reduces fatigue. This is an intelligent approach to luxury that indulges you in the ways that really count.

LEGACY 450 SPECIFICATIONS

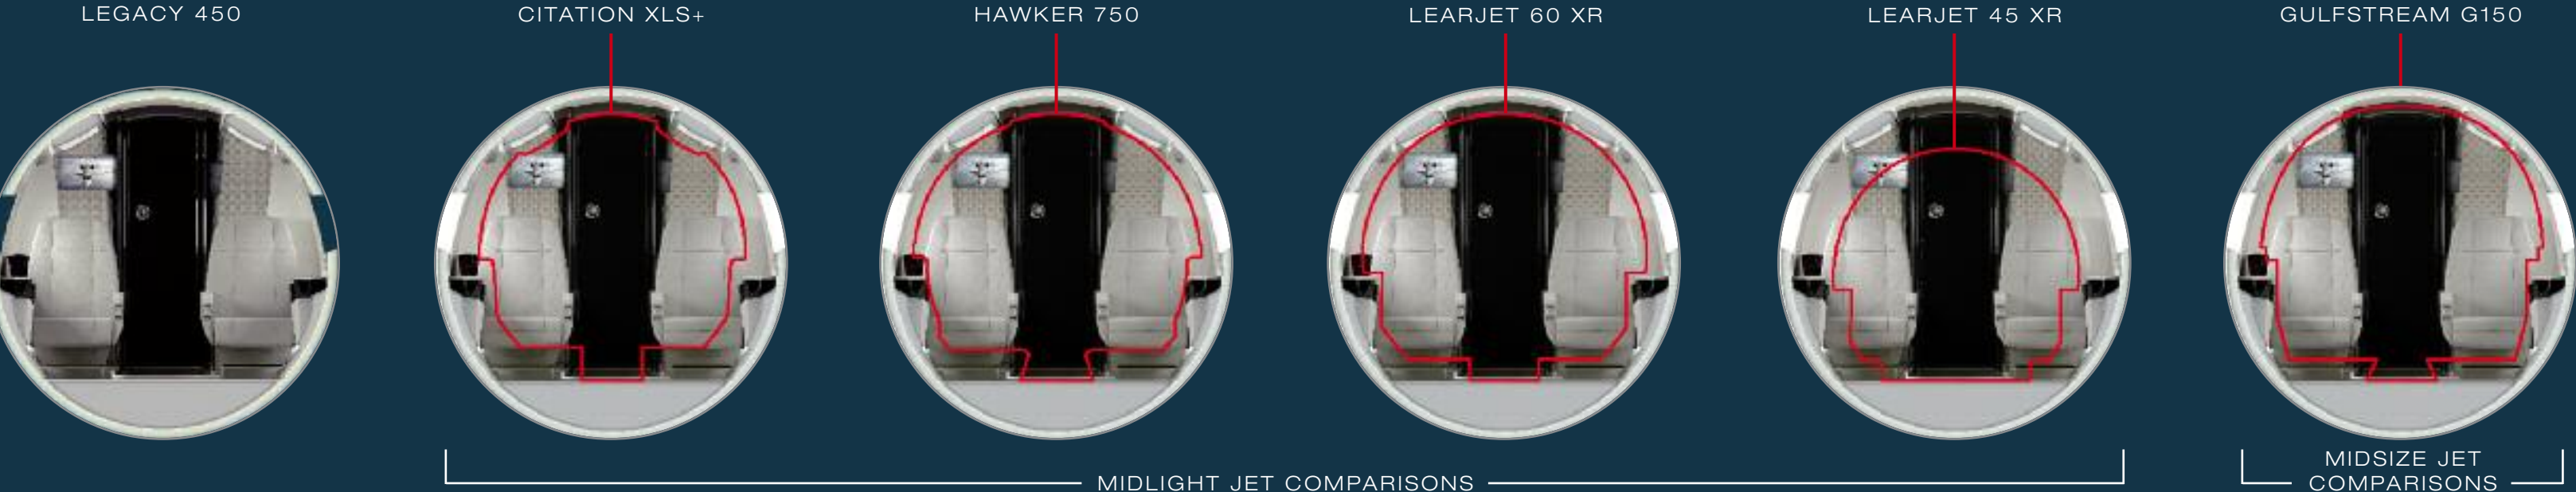

Range (NBAA reserves, 200 nm alternate, LRC, 4 pax):	2,300 nm
Range (NBAA reserves, 200 nm alternate, M 0.78, 8 pax):	2,200 nm
