All gyroscopic instruments tested on ONE APPARATUS!

This Combined Test Apparatus will test all your gyroscopic instruments—Artificial Horizon, Direction Indicator, Turn & Bank Indicator and Automatic Pilot—under conditions of roll, pitch and yaw; rotation; vibration; erection; and angle of bank. Yet it all packs away into a simple wooden case that is easily transportable.

*And it packs
away into
this —*

The image shows a large, dark wooden test apparatus with a vertical scale and a smaller wooden case in front of it. The large apparatus has a circular platform on top and a vertical scale with two circular dials. The smaller case is open, revealing internal components. The background is a light, textured surface.
